OSH Connect is more than just a conference. It is an ecosystem centered on safety which constitutes of the best and most capable experts from numerous industries to not only exchange on safety practices but also to establish and imbue safety as a core concept of every industry. In the midst of a global pandemic, MSOSH has recognized the need for industries to come together and forge a united effort in mitigating or eliminating safety risks.

OSH Connect aims to be more than brand or ecosystem. It aims to be a lifestyle of the new normal.

ABOUT MSOSH & MYsheqa

Established in 1971 and was later renamed as the Malaysian Society for Occupational Safety and Health (MSOSH) in 1991, the society has long since embedded itself as a premier and leading collective of the industry. Comprising of the best minds in Occupational Safety and Health (OSH) with the patronage of YAB Minister of Human Resources Malaysia, the inception of MSOSH began with the goal of being Asia Pacific’s leading OSH organization in mind and has since seen over 4000 registered members with over 1500 active practitioners within their ranks.

OSH Connect aims to strengthen this stance and in their pursuit, My Sheqa Group Sdn. Bhd. has been appointed as co-organizer for OSH Connect. Dating back to 2014, MySheqa was firmly built as an organization that specializes in Health, Safety, and Environment with recent achievements that made waves in the industry such as hosting the Borneo OSH Conference & Exhibition 2019 as well as hosting the largest OSH webinar in Malaysia on June 6th 2020.

OSH Connect is the combined effort of both MSOSH and My Sheqa to mobilize top industry professionals in spearheading the OSH industry.

CONFERENCE OBJECTIVE

- To gather experts, practitioners, and on-practitioners of all fields in an effort to confer the best safety practices and standards for industries during these trying times.
- To develop a myriad of strategic approaches in addressing the COVID-19 pandemic that stretches up to multiple angles; compliance and risk management
- To provide reliable insight and data to the ecosystem of industries in an effort to construct a better, much safer new normal for everyone.
- To form close relationship between OSH practitioners with non-OSH practitioners in building a greater tomorrow.
- To embed OSH as an integral part of every industry as we move to create a world that is much more aware of safety and how it should be a lifestyle instead of mere obligation.
